EDUCATION

VIT Bhopal University **Sep 2023 – May 2027**
B.Tech in Computer Science and Engineering (CGPA: 8.54/10) Bhopal, India

Dr. Virendra Swarup Education Centre **2021 – 2023**
ISC (Class XII): 89.6% | ICSE (Class X): 87.67% Kanpur, India

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
Frameworks and Technologies: React.js, Node.js, Express.js, FastAPI, Socket.IO, BullMQ, Tailwind CSS
Databases: PostgreSQL, PostGIS, MongoDB, Redis
Cloud and Tools: AWS (EC2, S3, VPC), Docker, Git, GitHub Actions, Postman, Playwright, Jest
AI and LLMs: LangChain, LangGraph, RAG, Embeddings, Vector Search, LLM APIs
Relevant Coursework: Data Structures and Algorithms, OOP, DBMS, Operating Systems

WORK EXPERIENCE

GeekyAnts Jun 2026 – Aug 2026
Software Engineer Intern Remote

- Built real-time messaging with Socket.IO and React, implementing optimistic UI updates and message reconciliation to handle connection drops and failed deliveries.
- Developed backend credit ledger APIs in Node.js and PostgreSQL, using row-level locking and transactions to prevent race conditions during checkout.
- Implemented product search with multi-parameter filtering and URL-synced state; wrote Jest unit tests covering ledger balance calculations and CSV exports.

PROJECTS

TaskGenie – On-Demand Service Marketplace Nov 2025
React.js, Node.js, PostgreSQL, Redis, BullMQ, Docker, AWS Live Demo | GitHub

- Engineered concurrency-safe booking APIs using PostgreSQL advisory locks and exclusion constraints, preventing double-bookings under 200 virtual users in k6 load tests.
- Built location-based provider search using PostGIS spatial indexes and Redis caching, handling 856 cached requests/sec at 289ms p95 latency.
- Secured Razorpay payments using HMAC-SHA256 verification, idempotent processing, and refund reconciliation to handle failed or duplicate transactions.
- Built an event-driven notification pipeline via BullMQ and Socket.IO; integrated AWS S3 presigned URLs for zero-egress document ingestion and deployed containerized services to AWS EC2.

Udaan - Scholarship Intelligence Engine Jun 2026
Python, FastAPI, Node.js, Express, LangGraph, MongoDB, Redis, Playwright Live Demo | GitHub

- Built a scholarship ingestion pipeline using Node.js and FastAPI to extract guidelines from government portals and PDFs, with SHA-256 change detection and versioned source snapshots.
- Architected an AST rule engine using 3-state Kleene logic and BullMQ/Redis to asynchronously evaluate criteria deltas and dispatch deduplicated alerts.
- Built a LangGraph-based AI research agent that retrieves official scholarship guidelines and uses retrieval-augmented generation (RAG) to produce source-cited answers while flagging missing information.

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Cloud Practitioner (CLF-C02), Amazon Web Services Credly
TCS CodeVita (Season 13), ranked in top 2% globally (Rank 10,298 / 669k+) 2025
Competitive Programming: Solved 450+ DSA problems in Java LeetCode | Codeforces

LEADERSHIP AND ACTIVITIES

Google Developer Groups (GDG) Nov 2024 – Jul 2025
Core Technical Member Bhopal, India

- Co-facilitated web development workshops for 40+ students and contributed to technical events and community activities.
