EDUCATION

VIT Bhopal University **Sep 2023 – May 2027**
B.Tech in Computer Science and Engineering (CGPA: 8.54/10) Bhopal, India

Dr. Virendra Swarup Education Centre **2021 – 2023**
ISC (Class XII): 89.6% | ICSE (Class X): 87.67% Kanpur, India

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
Frameworks and Technologies: React.js, Node.js, Express.js, FastAPI, Socket.IO, BullMQ, Tailwind CSS
Databases: PostgreSQL, PostGIS, MongoDB, Redis
Cloud and Tools: AWS (EC2, S3, VPC), Docker, Git, GitHub Actions, Postman, Playwright, Jest
AI and LLMs: LangChain, LangGraph, RAG, Embeddings, Vector Search, LLM APIs
Relevant Coursework: Data Structures and Algorithms, OOP, DBMS, Operating Systems

WORK EXPERIENCE

GeekyAnts Jun 2026 – Aug 2026
Software Engineer Intern Remote

- Built buyer–seller chat with Socket.IO, with optimistic sends, temporary-ID reconciliation, JWT-authenticated rooms, and rollback on network failure.
- Debugged and eliminated race conditions in credit ledger and checkout APIs (Node.js, PostgreSQL) using row and advisory locks; verified the fix with 40 parallel requests on 200k+ records and zero balance mismatches.
- Built GST-compliant invoicing and multi-tenant CSV export in Node.js, with formula-injection sanitization and 1,500+ generated tests for tax check-digit validation.

PROJECTS

TaskGenie – On-Demand Service Marketplace Nov 2025
React.js, Node.js, PostgreSQL, Redis, BullMQ, Docker, AWS Live Demo | GitHub

- Engineered concurrency-safe booking APIs using PostgreSQL advisory locks and `btree_gist` exclusion constraints, preventing double-bookings under 200 virtual users in k6 load tests.
- Built location-based provider search using PostGIS spatial indexes and single-flight in-memory caching; sustained 856 req/s at 289ms p95 in a local k6 benchmark (200 VUs).
- Secured Razorpay payments using HMAC-SHA256 verification, idempotent processing, and refund reconciliation to handle failed or duplicate transactions.
- Deployed containerized services on AWS EC2; used S3 presigned URLs for direct, secure document uploads that bypass the application server.

Udaan – Scholarship Intelligence Engine Jun 2026
Python, FastAPI, Node.js, Express, LangGraph, MongoDB, Redis, Playwright Live Demo | GitHub

- Built a Node.js/FastAPI pipeline to crawl government portals, parse PDF guidelines, and track updates through SHA-256 change detection and versioned snapshots.
- Developed a LangGraph RAG agent (Gemini/Groq, MongoDB checkpoints) to answer scholarship eligibility questions with source citations and flag missing information.
- Implemented an AST-based eligibility engine using three-state Kleene logic and BullMQ/Redis for asynchronous evaluation and deduplicated alerts.

CERTIFICATIONS AND ACHIEVEMENTS

AWS Certified Cloud Practitioner (CLF-C02), Amazon Web Services Credly
TCS CodeVita (Season 13), ranked in top 2% globally (Rank 10,298 / 669k+) 2025
Competitive Programming: Solved 450+ DSA problems in Java LeetCode | Codeforces

LEADERSHIP AND ACTIVITIES

Google Developer Groups (GDG) Nov 2024 – Jul 2025
Core Technical Member Bhopal, India

- Taught web development workshops to 40+ students, explaining technical concepts and helping debug their issues live.
