## EDUCATION

### VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering - CGPA: 8.54/10

Bhopal, India

Sep. 2023 - May 2027

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, SQL, HTML5, CSS3

**Frontend:** React.js, Next.js, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, WebSockets (Socket.IO), BullMQ

**Databases:** PostgreSQL, MongoDB, Redis

**Cloud & Tools:** AWS, Docker, Playwright, Git, GitHub Actions, Postman

**Coursework:** Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems

## EXPERIENCE

### Software Engineer Intern

GeekyAnts

Jun. 2026 - Aug. 2026

Remote

- Engineered RESTful APIs and designed PostgreSQL schemas using Node.js and Express.js, optimizing query execution for core search and filtering workflows.
- Integrated WebSockets (Socket.IO) to push real-time client updates and built asynchronous webhook handlers to process external service events.

## PROJECTS

### Udaan - Scholarship Intelligence Platform | Node.js, MongoDB, Redis, Playwright | Live | [GitHub](#) Jun. 2026

- Implemented a rule-based engine to match student profiles with scholarship eligibility criteria and provide instant eligibility results with supporting sources.
- Orchestrated scheduled reminder notifications and scrapers using BullMQ and Redis with job deduplication, ensuring timely deadline alerts without saturating API workers.
- Built a Redis caching layer with query hashing, reducing database read latency by over 75% during high-concurrency searches.
- Developed an automated web scraping pipeline using Playwright and Cheerio with SHA-256 payload diffing to detect scholarship scheme updates across government portals.

### TaskGenie -- Service Marketplace | Node.js, PostgreSQL, Redis, Razorpay | Live | [GitHub](#) Nov. 2025

- Implemented location-based provider discovery using PostGIS spatial indexing to query nearby active providers and filter real-time availability slots.
- Prevented double-booking race conditions during checkout using PostgreSQL row-level locks and atomic transactions, backed by Redis for fast slot holds.
- Decoupled post-booking workflows (order confirmation, email invoices) into asynchronous BullMQ background jobs with dead-letter queues (DLQ) for failed delivery handling.
- Integrated a secure Razorpay checkout flow with HMAC-SHA256 signature verification, idempotent webhook processing, and OTP validation for completed jobs.

## CERTIFICATIONS & ACHIEVEMENTS

**AWS Certified Cloud Practitioner** - Amazon Web Services

**TCS CodeVita** - Ranked in the **Top 3%** globally (Rank 10,298 / 350,000+ participants worldwide)

## LEADERSHIP & ACTIVITIES

### Core Technical Member

Google Developers Group (GDG)

Nov. 2024 - Jul. 2025

Bhopal, India

- Conducted 3+ hands-on web development & API architecture bootcamps, mentoring 40+ engineering undergraduates.
- Collaborated on full-stack REST API development for a women's health platform and authored a technical article on Agentic AI workflows.
